

# Design Tools by Luxwood

Named the easiest & most powerful design system on the market

Design Tools makes the designing of decks, fences, garages and post-frame buildings simple, accurate and FAST. Really fast. Each of the four Design Tools modules integrate seamlessly to point-of-sale and accounting systems (at no cost) so that materials and pricing are specific to your business. Multiple price levels plus adjustable mark-up / margins / gross profit can be applied globally or on individual items. Design Tools is available in network and stand-alone versions and is highly customizable through its open scripting language. Comprehensive training is included in every sale.

## Deck Design

- quick & easy

In just minutes, decks of any size, uniqueness, or on any slope can be created. Quick and easy revisions, built-in engineering codes, and economical calculations of materials boost efficiency and profitability. With our step-by-step program inclusive of pictorial icons, even the most novice of user will be designing multi-level decks (built to engineered standards complete with pricing and plans) the very first try.

- Customize the construction methods to conform to any building code
- Easy-to-read detailed plans and cut lists boost customer service
- Design decks with ANY manufacturer's flooring product or hand-rail system
- For installed sales jobs, detailed labour calculations are easily customized

## Fence Design

- a powerful tool

Create fence designs in modules or by the running foot, with fixed post or even spacing. Design with any fencing material -wood, vinyl, or chain link with precise accuracy– down to the last nail or screw. Comprehensive designs ensure that all materials are accounted for in the fencing job ensuring better service and better sales.

- Quote the fence as bulk materials or pre-assembled modules
- Calculate all hardware and fittings for gates, including pre-manufactured
- Design decks with ANY manufacturer's flooring product or hand-rail system
- 3D views of the individual modules or of the entire layout

# Garage Design

- the sale's persons best friend

Quickly calculate every component of the building –including wall framing, windows, doors, drywall, roofing, siding, insulation, masonry, and more. Building standards for your location can be pre-set. And, detailed plans and 3D pictures of the garage help instil customer confidence and improve sales.

- Speed and simplicity make this the ideal tool to boost sales
- Up-selling is made easy as additional components can be added with the click of a button
- Comparisons between material and/or method costs are a snap

# Post-Frame Design

- the most complete design system available

Imagine... designing a basic four-sided post-frame building with multiple doors and windows in under 4 minutes, including all drawings, parts list, and pricing. With the Luxwood system it's a reality. Find out what so many successful post-frame contractors and suppliers already know... find out more about Luxwood's Post-Frame Design.

- Built-in engineering assists the designer in choosing preferable material and construction methods for each job's location
- The click of a button produces full reports, including a bill of materials, pricing, shipping lists, and more
- Detailed material calculations insure accuracy
- Large architectural standard drawings can be produced on any Windows compatible large format printer or plotter
- Print drawings to scale, include title block, add notes/text, and save in multiple formats for publishing or sending as e-mail attachments

*"Since 1996, we have had a great relationship with Luxwood. We have found Luxwood to be a company of integrity, outstanding work-ethic, and tremendous knowledge and innovation. The Deck, Garage, Post-Frame & Fence Design Tools are the best I have seen, and I have seen them all."*
